Tag-Clear Driver ID

Vehicle & Mobile Plant Safety Systems

OVERVIEW

Tag-Clear Driver ID is an advanced RFID-based operator identification system designed for vehicles and mobile plant machinery. It provides real-time visibility of who is operating each machine while integrating seamlessly with the on board Digital Recording System for maximum safety, accountability, and compliance.

WHY CHOOSE TAG-CLEAR DRIVER ID

Tag-Clear Driver ID transforms safety and compliance from a manual process into a smart, automated solution. With real-time operator visibility, behaviour tracking, and the power to immobilise vehicles when needed, DRIVERID helps businesses protect people, assets, and reputations.

RFID OPERATOR LOGIN

Operators use RFID cards or tags to log into the vehicle or machine before operation begins.

LIVE PORTAL INTEGRATION

Instantly displays the current operator in the online safety portal for complete visibility

DRIVER BEHAVIOUR ANALYTICS

Generates reports on operator activity, including near-miss alerts, risk behaviour patterns, and compliance records.

VEHICLE IMMOBILISATION

Restricts machine or vehicle access to only authorised operators with the correct credentials. – Upgrade Required

CUSTOMISABLE PERMISSIONS

Tailor access levels to specific vehicles, machinery, or job roles.

SEAMLESS INTEGRATION

Works alongside telematics, DVR systems, and other safety technology for a complete safety ecosystem.

BENEFITS

ENHANCED SAFETY

Ensure only trained and authorised operators can use machinery.

ACCOUNTABILITY & TRANSPARENCY

Real-time visibility of operator activity across all sites.

RISK REDUCTION

Proactive alerts and behaviour analysis help prevent incidents before they happen by highlighting drivers at high risk.

COMPLIANCE REPORTING

Easily generate auditable records for health & safety inspections.

OPERATIONAL EFFICIENCY

Centralised data for smarter decision-making and resource allocation.

APPLICATIONS

- Construction Equipment & Mobile Plant
- Fleet Vehicles
- Logistics & Warehousing Operations
- Industrial Manufacturing Sites

OPTIONAL ENHANCEMENTS

- **Vehicle Immobilisation:**
  Prevents ignition or system activation without correct login credentials.
- **Advanced Analytics & Dashboards:**
  Custom reports on driver performance, risk scores, and site safety metrics.
